

## ÉDITO :

Dear Pupil's' Parents,

The school's administration council met on January 20th to work on an economical model for the LIFT. It voted for, unanimously:

- **Elementary classes tuition fees** (from CP to CM2) for next school year : **360 500 \$NT**;
- **Registration fees** (that you don't have to pay again next year) : **51 500 \$NT**;

(which is a 3% raise)

- **6eme class tuition fees** : **420 000 \$NT**;  
(which is a 16,5% raise regarding elementary school).

The raise of tuition fees is due to inflation, that impacts our expenses in pedagogical material and investments. This also has an effect on our teams wage policy, since we want to keep attractive positions for them. We limited as much as we could this inflation's impact, considering for instance that the price of the elementary products in Taipei have increased by 8%.

The price range of tuition fees in secondary school reflects the specific human and material means we need on this level. The difference between elementary and secondary school is in the average range of French schools abroad.

The budget execution this year nevertheless confirms **the robustness of our economical model**, based on real estate and movable property investments by the French business community and on the funding of our functioning expenses by the incomes we create, i.e via tuition fees, thus guaranteeing the long term school economical sustainability.

Our rates policy adjustments includes also **the launching of next year's subscriptions**.

**LIFT really is successful.** With Anthony Belin we have more and more meetings with new families, whose diversity of profiles shows LIFT's educational community will get richer and richer in the years to come. Nonetheless, we maintain **our 20 pupils maximum per class requirement**, and **our "more teachers than classes" principle**, since pedagogical differentiations and each child care is part of our identity.

As LIFT's families, you naturally have the priority so that your children continue a happy schooling in our school; we offer a simplified filling form. Do not hesitate to spread the word about LIFT and to share our communication parts, classes are filling up rather quickly!
