

Next week, all the classes of the school will organize a movie projection for the school and Cinema Program.

Therefore, we will watch 5 movies throughout the year to develop the pupils' cinematographic knowledge. We will choose films from different countries and languages.

Our trip will start with the discovery of two silent cinema classics: *The Circus* from Charlie Chaplin and *the General* from Buster Keaton. This will be the opportunity to present the beginning of cinema and to explore the burlesque genre and black and white film aesthetics.

The school and cinema program

This program offers to the pupils, from CP to CM2, an introduction to cinematographic art during the projections organized for the occasion. The teachers and cultural partners help them learn the basics of cinematographic culture and by dedicating some class work time to those movies.

Usually the presented movies are "art house cinema" movies, so that we can show them something they are not used to watching and help them get out of their cultural comfort zones and broaden their cultural horizons.

As part of the artistic and cultural program, the goal is to approach cinema as an art to discover its language and ultimately develop a sensitivity, knowledge and the tastes of the future spectators who, hopefully, will regularly go to the cinema once they are adults.

The program
